G. Mulder and G.P. van Galen, Introduction. How continuous are discrete notions of human information processing? 1

I. Architectures and Methods

J. Miller, F. van der Ham and A.F. Sanders, Overlapping stage models and reaction time additivity: Effects of the activation equation 11

K.R. Ridderinkhof, M.W. van der Molen and T.R. Bashore, Limits on the application of additive factors logic: Violations of stage robustness suggest a dual-process architecture to explain flanker effects on target processing 29

A. Dutta, R. Schweickert, S. Choi and R.W. Proctor, Cross-task cross talk in memory and perception 49

G. Mulder, A.A. Wijers, J.J. Lange, B.M. Buijink, L.J.M. Mulder, A.T.M. Willemsen and A.M.J. Paans, The role of neuroimaging in the discovery of processing stages. A review 63

J. Requin and A. Riehle, Neural correlates of partial transmission of sensorimotor information in the cerebral cortex 81

F.T.Y. Smulders, A. Kok, J.L. Kenemans and T.R. Bashore, The temporal selectivity of additive factor effects on the reaction process revealed in ERP component latencies 97

A. Osman, C.M. Moore and R. Ulrich, Bisecting RT with lateralized readiness potentials: Precue effects after LRP onset 111

M.G.H. Coles, M.K. Scheffers and L. Fournier, Where did you go wrong? Errors, partial errors, and the nature of human information processing 129

H.G.O.M. Smid and G. Mulder, The availability versus the use of partial information: Multiple levels of selective processing between perception and action 145

D.E. Meyer, D.E. Kieras, E. Lauber, E.H. Schumacher, J. Glass, E. Zurbriggen, L. Gmeindl and D. Apfelblat, Adaptive executive control: Flexible multiple-task performance without pervasive immutable response-selection bottlenecks 163

II. Discrete versus Continuous Representations

D.W. Massaro and M.M. Cohen, Continuous versus discrete information processing in pattern recognition 193

A.F. Sanders, Discrete vs. continuous processing: The fate of an incompletely processed perceptual dimension 211

J. Kounios and R.W. Smith, Speed-accuracy decomposition yields a sudden insight into all-or-none information processing 229

III. Discrete and Continuous Models of Motor Control

J. Levy and H. Pashler, Does perceptual analysis continue during selection and production of a speeded response? 245

D.E. Irwin, L.A. Carlson-Radvansky and R.V. Andrews, Information processing during saccadic eye movements 261

R.W. Proctor, C.-H. Lu, H. Wang and A. Dutta, Activation of response codes by relevant and irrelevant stimulus information 275

R. de Jong, Perception-action coupling and S-R compatibility 287
M. Eimer, B. Hommel and W. Prinz, S–R compatibility and response selection 301
H. Heuer, Models for response–response compatibility: The effects of the relation between responses in a choice task 315
W. Spijkers and S. Spellerberg, On-line visual control of aiming movements? 333
